Contractor: Darby Creek Excavating, Inc.
Circleville, OH

Description: The City will be replacing aging waterlines and roadways in 2013 with help from an OPWC grant and 0% loan. The Tank Town Waterline Replacement & Roadway Improvements Project will be start early in 2013 and continue until a fall completion. Much of the waterline construction will be done by horizontal drilling, limiting the amount of excavation needed to install the mains. The work will take place in the following areas:

Highland Ave. - New waterline, some new storm, curbs and pavement.

Water St. – New waterline, new storm, curbs and pavement.

Trine St.(E. Fairfield to Jennings) – New waterline.

E. Fairfield St. – New waterline.

Kramer St. (Franklin Co.) – New waterline, resurface the roadway.

Jennings St. (Franklin Co.) – New waterline, resurface the roadway. Some new storm.

Beatty St. – New waterline, curb repairs, new pavement.

West Alley – New waterline.

Park St. – New waterline.

Beck St. – New waterline

West St. – New waterline, new pavement, some sidewalk improvements.

Cherokee Ct. N&S – New waterline.

Mohican Ct. – New waterline.

Elizabeth St. – New waterline.

Traffic and Access Impacts:

Generally, during working hours there will be impacts to parking and some limited interruptions to driveway access. There may be lane restrictions to allow adequate room for equipment to operate safely.

West St., Beck St. and Park St. – Reconstruction of the West St. roadway will require some limited closures. Access to West St. and subsequently Beck St. and Park St. may be limited to coming from one direction only at times. Either from Groveport Rd. only or from Waterloo St. only, depending on the contractors work location on West St. Appropriate notice will be provided for traffic changes. Additional parking will be available at the pool parking lot.

Highland Ave. – Partial closures can be anticipated during the roadway reconstruction. Appropriate notice will be provided for traffic changes.

Water St. – One lane or one way access to the Post Office may be required during pavement reconstruction. Directional signage directing traffic to the Post Office will be posted.

Beatty St. – Partial closures can be anticipated during the roadway reconstruction. Appropriate notice will be provided for traffic changes.

West Alley – Due to the narrow constraints of the alley, some isolated closures may be required. At any given time, properties should have access to either Trine St. or High St.

During the milling and resurfacing operations there will need to be some work day road closures. Advance notice of these closures will be provided.

Schedule:

Bid Opening - January 25, 2013

Award Contract - February 4, 2013

Start Work – March 1, 2013

Completion – August 25, 2013
